

Postgraduate Course

„Hemostasis, Stapling and Suturing”

Wednesday, 26th August 2015 9:00 – 14:00

Workshop Directors: Philipp Beckerhinn (Austria)

Kelvin Higa (USA)

Tutors: Philipp Jonas (Austria)

Tobias Frankl (Austria)

Course Overview and Targets:

The “Hemostasis and Stapling” Workshop will provide trainees with a hands-on possibility to experience different methods of hemostasis on one hand and performing stapled resections and anastomoses on living animal tissue in the pig lab on the other.

Course objectives

1. Preparation

Dissection of the omentum using the Harmonic Scalpel

2. Stapling of anastomoses

Experience the handling of linear stapling devices by performing resections of the stomach as well as linear anastomoses between small bowel segments

3. Suturing

Closing the enterostomy by performing laparoscopic stitches

Hand sewn anastomotic technique

4. Hemostasis

Bleedings of liver and spleen will be managed using the different hemostatic devices

Online Registration mandatory: www.IFSO.com

Program:

- 7:45 Meeting for transfer to Baxter (Orth/Donau)
- 8:45 Arrival at Baxter Animal Lab
- 9:00 Introduction to the pig anatomy (Dirk Labahn, Facility Manager Baxter)
- 9:15 Product information (Hemopatch, FloSeal, Peristrip, Duplo MIS)
supported by Baxter (Klaus Koller, Sales Manager, BioSurgery)
- 9:30 Product information stapling devices (supported by Ethicon)
- 10:00–14:00 Training in the Animal lab
- 14:00 Closing remarks and hand-out of certificates

Snacks and drinks will be provided during training breaks
